

MACICT 3 YEARS!

and this
is only
beginning!

Co-funded by the Erasmus+
Programme of the European Union

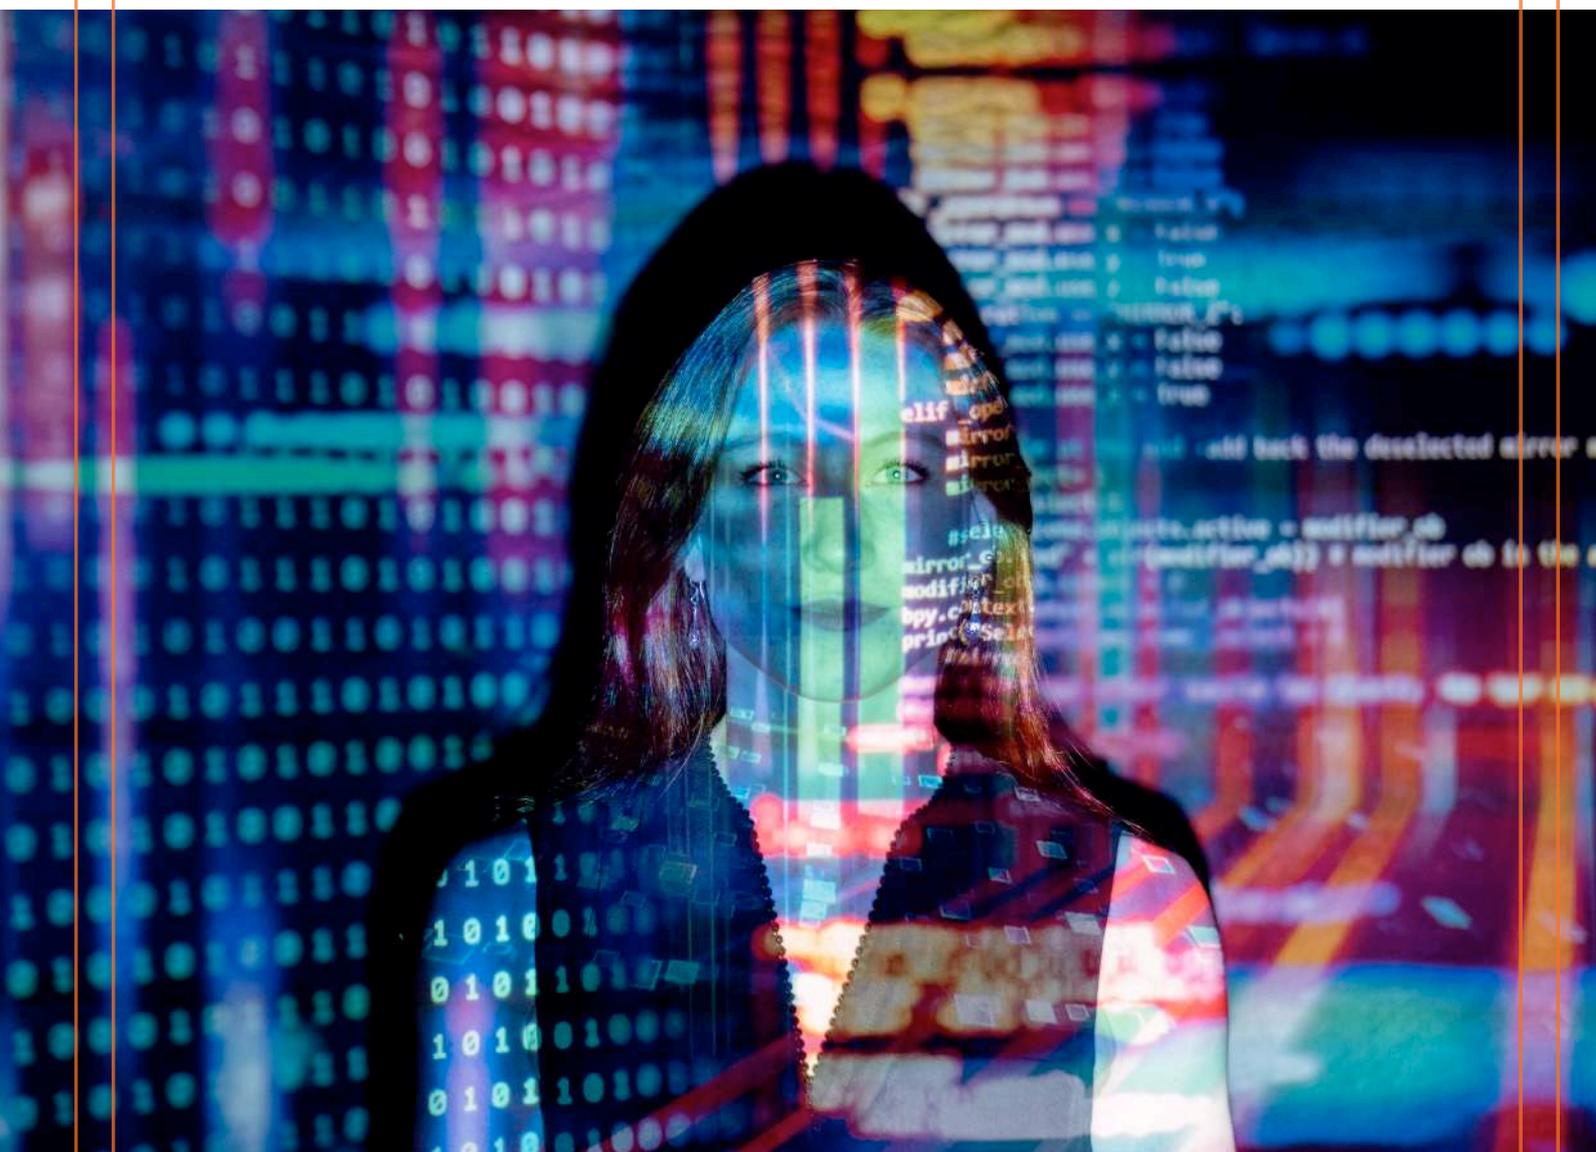

This project has been funded with support from the European Commission. This publication [communication] reflects the views only of the author, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

Although the project officially ends in November 2021, we believe this is just the beginning.

During the project, we have updated and created about 50 courses by a team of highly qualified specialists from Belarus, Germany, Denmark, Finland, and Poland.

About 200 students took part in piloting the upgraded courses.

About 50 companies actively collaborated with the project, teachers and students.

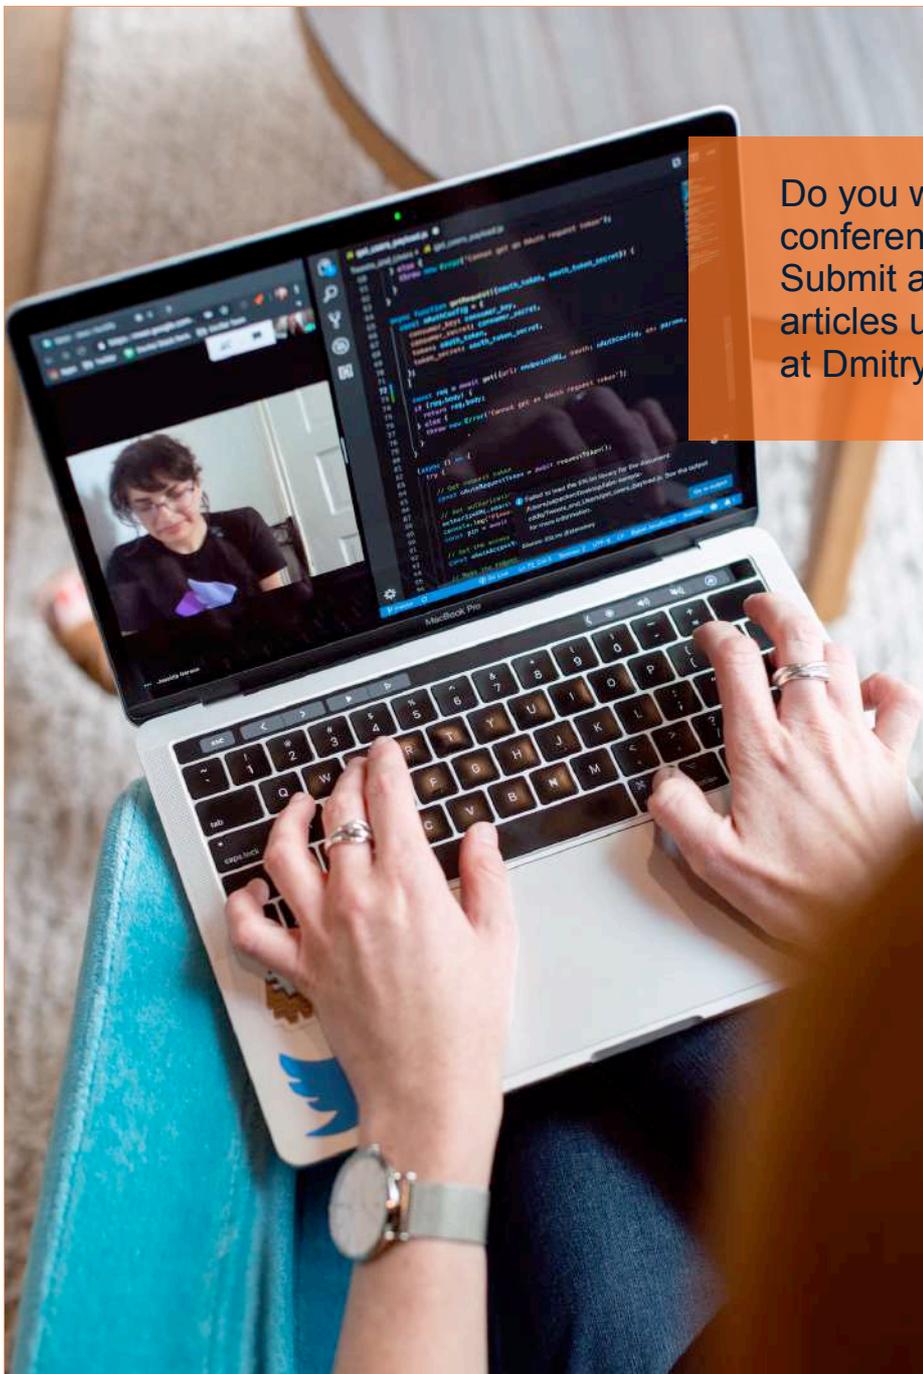

Together we made it possible and showed that even during a pandemic, an unstable political situation, professionals in their field remain true to themselves and continue to work no matter what!

The process has been launched and MACICT methods will continue to be used, because the feedback has shown high interest and involvement at various stakeholders levels.

Do you want to take part at the conference?
Submit an electronic version of articles until October 20, 2021 at DmitryPertsev@gmail.com.

Requirements

- 2-6 pages A4 with description of work results
- English
- format - Word (docx)
- APA format for scientific articles

On November 10, 2021 we will hold an open hybrid MACICT conference, where we will share the most important results of the project (there are so many of them that naturally it will not fit into one brochure).

We invite everyone; teachers, students, applicants, undergraduates, alumni, representatives of IT companies, your friends and everyone to learn about the opportunities, results and learning process in the master's program of leading universities.

The lucky ones will share their results and will be published in the MACICT conference proceedings.

Co-founded by the Erasmus+ Programme of the European Union

In the meantime, look what awaits you at the conference:

- >> SCRUM through the eyes of course participants
- >> How to write a handbook on SCRUM
- >> The role of quality control in projects on the example of MACICT
- >> How to engage campaigns and build strong win-win relationships
- >> Things to consider when creating courses and much more

Co-founded by the Erasmus+ Programme of the European Union

For three years at MACICT, we have solved a number of tasks:

1. Modernized the existing MSc curriculum in ICT using the best practices of EU partners - strategies, pedagogical approaches and teaching methods to support the professional knowledge and skills required in the modern labor market.
2. Modernized the existing ICT Master's program and included new interdisciplinary courses to equip students with the competitive knowledge, soft skills needed to enter the job market, pursue successful careers in existing companies, or start their own business.
3. Accredited the program.
4. Developed and applied a strategy, guidelines and quality assurance principles to improve the modernized curriculum by involving undergraduates and the labor market in the assessment and further improvement of the master's degree.
5. At the pilot stage, we launched a modernized master's program.
6. Facilitated the cooperation of students from the EU and Belarus through the implementation of projects to solve real-life problems by international student groups.
7. Ensured the quality of the program and made the necessary improvements in subsequent stages.

The fulfillment of these tasks helped to change the pedagogical views, approaches and methods of teaching by teachers in Belarus, changing the outlook of students and their adaptability to society, changes in the labor market, in which graduates of the modernized interdisciplinary magistracy discovered better job opportunities for themselves.

About 10 students have already received employment thanks to the project.

We will be glad to see you at the final MACICT conference, as well as on our website and social media, because there we have prepared reports, courses, leaflets and the latest project news for you.
