The first year of study in the MACICT program is over!

We are sharing results

First year of study: 01 September 2020 - 30 June 2021

66 students, 73 teachers, 26 companies

We have successfully completed our goals and objectives:

- ✓ 50 courses have been updated / created from scratch
- ✓ prepared specialists for professional activities at the international level
- ✓ tested new teaching methods and approaches, using the best experience of European colleagues
- ✓ improved the quality of knowledge and professional competencies of undergraduates
- ✓ exchanged experience between partner universities (both students and teachers)
- ✓ improved teamwork and distance skills (using the example of Scrum methodologies)
- ✓ 7 undergraduates received job offers from IT companies
- ✓ undergraduates noted a high level of training
- ✓ more than 30 undergraduates continue their studies

What difficulties did we face?

Co-founded by the Erasmus+
Programme of the European Union

And how to avoid them?

1 High competition in the market of educational programs

Solution: creating accounts on social networks, organizing information days, distributing brochures, press releases in third-party media increase the university's image and its prestige in the educational services market.

Pre-course and post-course surveys help improve the quality of learning.

Remember! One of the best advertisements is a satisfied client who will recommend you further, whether it is an applicant or a company.

2 No deferral from military service when studying for a master's degree

Solution: to attract senior students to participate in SCRUM projects in order to increase motivation to continue their studies in the magistracy after serving in the army

3 COVID-19 Pandemic Causes Communication Problems

Solution: transferring meetings, courses, seminars within the project to an online format using zoom, skype, viber, discord, google services and etc.

**We are now ready for the second year of study!
